NOTE.—No alteration or delays will be accepted within 10 days of the date of despatch.

East African, Rhodesian and Long Distance Clients.

The following extracts from letters recently received will doubtless prove of interest :

Kenya.—"It is with pleasure for two reasons that I send you this order. One because I have never heard anything but praise for your trees, and two because I feel that a firm in a Gold Standard country that does not increase its prices to those off it deserves encouragement."

Kenya.—"I wish to tell you that the last consignment of first sized apple trees are **extremely** satisfactory. Not one has failed and all are growing well."

Umtali, S. Rhodesia.—"All the trees you sent me last year are doing extremely well."

Nyasaland.—"I have not lost one tree. They arrived in perfect condition, and although they were held up for ten days by the Customs at Port Herald they did not suffer at all. The growth since planting out in August is very good indeed."

India.—"I may mention that all the plants arrived in good condition."

Tanganyika.—"The trees all arrived in splendid condition and are doing very well."

TERMS AND CONDITIONS OF SALE AND GENERAL INFORMATION FOR CUSTOMERS.

1. In presenting our 39th Annual Catalogue we make no apology for the smallness of same. The depression has hit almost everybody, and whilst we have not depreciated the outstanding merits of our well known fruit trees and vines we have had to limit our expenditure in other ways.

2. Our Nurseries are annually inspected by the Government, and all trees sent out are guaranteed to be free from all insect pests and diseases.

3. We do not sell Cheap Trees. In the long run they invariably prove dear to the purchaser. Our Prices are reasonable, and all care is exercised in the selection of buds and scions. We have the retention of our good name always before us. A saving of a few pence per tree now may be bitterly regretted a few years hence.

4. Prices are clearly stated on pages 4 and 5.

5. Packing is carefully done for transmission to any part of the world. A moderate charge is made. See Price List.

6. Orders are accepted at any time for execution from the 15th June to 15th September. Citrus trees can be supplied at practically any time. Small orders, are welcomed, and receive the same care and attention as large ones.

7. Alterations or delays to orders cannot be accepted later than ten days prior to date of dispatch.

8. Cancellations of orders booked definitely cannot be accepted except in cases of real necessity.

9. Mistakes or errors should be notified to us immediately and same will at once be rectified. Our aim is to satisfy you.

10. Responsibility for delay or loss. We must emphasize the fact that all orders are at the risk of the purchaser after being put on rails. We must not be held responsible for any loss or delay that may occur through the negligence of the forwarders, or for the failure of any trees after being planted, as it must be recognised that once the trees have been placed on rail, well packed and in good condition

(which we guarantee), they are entirely beyond our control.

11. **Substitution.** Please answer questions on order form, and if no substitution is desired please say so.

12. **Selection of varieties** can be left to us if desired. We are well acquainted with the various districts and may be able to help you. Your confidence will not be misplaced.

FREE DELIVERY.

Orders for 50 or more trees or vines, no matter how many varieties or sizes, sent in one consignment, will be sent railage free to any railway station or railway road motor service station in the Union, including South West Africa, Swaziland and Lourenco Marques.

Rhodesian orders will also be sent carriage paid if 50 or more trees are ordered in one lot, but only to railway stations or sidings—not to road-motor stations. Any railway station to Congo Border and Beira.

All trees will be sent by goods train. If passenger train is desired, customers must pay the difference between the two rates.

13. **Full instructions** for planting accompany the dispatch of each order.

14. **Terms.** 5% discount is allowed off the cost of trees if paid within 30 days of date of invoice, but packing, postage, railage and freight, etc., are strictly nett. Interest at the rate of 7% will be charged on all accounts not paid within three months of invoice date.

Guarantee of Health and Genuineness, and Conditions of Sale.

Every possible precaution is taken to prevent errors and to ensure that our trees are true to name, but it is impossible to give any guarantee, express or implied, to this effect. It is therefore an express term of every contract for the sale of trees that, in the event of any trees being found untrue to name or label, we will be liable only either to supply fresh trees in the place of those found to be untrue to name or label or to refund the purchase price of the individual trees in question, and that no other or further liability for loss or damage direct or indirect, will rest on us.

We further stipulate that in cases of orders booked for delivery more than three months ahead we will not recognise any liability in the event of failure to effect delivery on the agreed upon date, if such failure be caused by the trees failing to grow to standard size owing to adverse weather or other conditions or by their delivery being rendered impossible or impracticable for any other reason.

This guarantee further ensures to clients that all Apple trees sold by us as worked on blight-proof stock are duly worked on such stock; and again, all Vines are grafted on Phylloxera-proof stock.

All trees at time of leaving our premises, are guaranteed healthy and free from Crown Galls, Insect Pests and other diseases.

Small orders of Fruit Trees can be sent by Parcels
Post quite satisfactorily.

TO CLIENTS IN RHODESIA.

Customs Forms accompany advice of despatch, and must be presented to your Station when the trees are called for.

Citrus trees can now enter Rhodesia, but special permits must be obtained from the Director of Agriculture, at Salisbury or Livingstone, and must accompany order.

TO CLIENTS IN KENYA, NYASALAND, TANGANYIKA, Etc.

Permits to import must be obtained from the Directors of Agriculture at Nairobi, Zomba, or Dar-es-Salaam, and forwarded to us with the orders. Trees for Kenya and Tanganyika are shipped from Lourenco Marques, and accounts for freight and shipping charges will be rendered by the following mail. Trees for Nyasaland can be sent direct to Beira for trans-shipment to the Shire Highlands Railway.

"HINTS ON FRUIT GROWING." By H. E. V. Pickstone.

We shall be pleased to send a copy of this book in English, free of all expense to any grower who cares for one.

We are convinced that a perusal will obviate many mistakes, and much valuable information on all matters pertaining to the Fruit Industry from the experience of many experts is compiled therein.

The ninth edition in English is now available. The Afrikaans edition is meanwhile exhausted.

GIANT HEIDELFINGER.—Very large. Dark red to black. Recommended.

GOVERNOR WOOD.—Very prolific. Small to medium. Yellow to bright red.

KENTISH.—Small, round. Red. Prolific bearer. A good cooking cherry.

MONSTREUSE DE MEZEL.—Good size. Bright red to yellow. Recommended.

MORELLO.—Medium size. Dark red. Very tart. Suitable for canning, cooking and making brandy.

NAPOLEON BIGGAREAU.—Very large. Yellow with red blush. Recommended.

ALMONDS.— On Peach Stocks.

(Several varieties of Almonds should be planted in close proximity to ensure thorough cross-fertilisation. The more sorts planted the better.)

BRAND'S JORDAN.—Similar to Jordan, but soft shell.

BRITZ.—Hardy and a heavy bearer. Soft shell. Said to be self-fertile.

DRAKE'S SEEDLING.—A late bloomer. Soft shell. Bears heavily and early.

I.X.L.—Nuts large. Soft shell.

JORDAN.—The largest and most celebrated almond. Hard shell.

NE PLUS ULTRA.—Very large. Soft shell. Bears heavily.

NONPAREIL.—Medium size. Regular bearer. Soft shell.

PAPER SHELL.—Bears well. Very thin shell, but smaller than Nonpareil.

TEXAS PROLIFIC.—Late bloomer. Heavy bearer. Soft shell.

QUINCES.— On Quince Stocks.

BORRIE.—Soft flesh. Completely yellow. An old favourite.

CAPE SELECTED.—A South African variety selected by ourselves.

MEECHES' PROLIFIC.—Large. Golden yellow. Bears early. Very productive.

ORANGE.—Large. Roundish. Golden yellow. Productive.

PORTUGAL.—Large. Yellow. Pear shaped.

RAE'S MAMMOTH.—Resembles the Orange variety, but larger.

VAN DIEMAN.—Above medium size. Greenish yellow. Subacid. Bears well.

FIGS.

ADAM.—Skin brownish. Flesh pink to red. Medium to large. Heavy bearer.

CALIMYRNA.—Commonly called Smyrna. Greenish to light yellow. Flesh pink. Needs cross-fertilisation with Capri.

CAPRI.—The wild fig used as a host for the Blastophaga wasp to fertilize Calimyrna. Worthless otherwise.

CASTLE KENNEDY.—Very large. Pale brown mottled with grey. Flesh pale, slightly red. Not recommended in cold districts.

EVA.—Below medium size. Flavour excellent. Said to be the best for konfyt.

NEGRO LARGO.—Very large. Jet black. Flesh pale red.

NEW BRUNSWICK.—Greenish-yellow, shaded brown. Flesh opalescent.

OLD CAPE WHITE.—Small, roundish, flat. Pale green. Flesh yellowish brown. The best for jam and suitable for drying.

TIGER.—Also known as Panachee. Medium size. Yellowish, striped with bands of green. Flesh bright rose colour. A prolific bearer.

WHITE ADRIATIC.—Medium to large. Green turning yellowish. Flesh pink to red. Good eater and drier.

WHITE GENOA.—Medium size. Skin greenish brown. Flesh pale red. An excellent sort.

MULBERRIES.

Large Black.

LOGANBERRIES.**WALNUTS.**

The common English variety.

VINES. — On Phylloxera-proof Stocks.

All extra strong, on 2 year old roots.

Early Varieties.

BLACK PRINCE.—Large. Hardy. Dark purple to black.

WHITE MUSCADEL.—Same as above but white.

Mid-Season Varieties.

ALPHONSE LAVALLE.—Large berries. Reddish black.

CRYSTAL.—Large round berries. White. Good flavour. Very popular.

GROS COLMAN.—Very large berries. Black. A most handsome variety.

HERMITAGE.—Medium to large. Oval black berries. Good flavour.

ROSAKI.—Similar to Waltham Cross. Very good for export and raisin making.

ROSE CHASSELAS.—A fine grape. When fully mature the berries are red. Keeps and carries well.

WALTHAM CROSS.—A handsome white grape, becoming a pale golden yellow. Berries large. Very good for export and raisin making.

VINES.—On Phylloxera Proof Stocks.—(Continued)**Late Varieties.**

BARBAROSSA.—Large, black, round berries. Tough skin. A good carrier.

BARLINKA.—Medium size oval berries, of deep purple. Very late. Carries well.

FLAMING TOKAY.—Large berries. Salmon pink to a reddish colour. Recommended for coast areas.

LADY DOWNES SEEDLING.—A round, black grape. Berries large. Handsome. A good carrier.

RAISIN BLANC.—Large, white berries. Good flavour and very popular.

RED HANEPOOT and WHITE HANEPOOT.—Very popular and well-known sorts. Can be used for all purposes. Very popular everywhere.

CITRUS TREES.

IMPORTANT NOTICE.—Our Citrus Trees of all varieties are worked from strains personally selected by us in California many years ago, and bud selection has been systematically carried out.

All our trees are grown in the Nursery to a single stem and each tree is trained to a stake. No expense is spared upon them. Frequently trees are delivered long distances within the Union and also outside its borders with a loss of less than one per cent. and there is absolutely no excuse for a planter not being able, with ordinary care, to establish with them a successful citrus grove, big or small.

All our citrus trees are worked on Rough Lemon Stocks.

ORANGES.

CLANWILLIAM SEEDLING.—Large and sweet. Ripens mid-season.

JAFFA.—Medium to late. Thornless. Very heavy and full flavoured. Almost totally seedless.

JOPPA.—Oblong. Almost totally seedless. Thin rind. Very juicy and sweet. Mid-season.

MEDITERRANEAN SWEET.—Thornless. Very productive. Fruit smallish, oval and inclining to thick skin. Soft, juicy, very sweet. Mid-season to late.

CITRUS TREES—(Continued)

ORANGES—(Continued)

NAVELENCIA.—Cross between Thompson's Navel and Valencia Late. Fruit of good size, smooth and thin skinned. Bears young.

PAPER RIND ST. MICHAEL.—A very heavy bearer. Fruit small, round, very solid and heavy. A general favourite. Mid-season.

WASHINGTON NAVEL (Pickstone's).—The true Navel selected by us in California many years ago. The best early orange and too well known to need any special description.

RUBY BLOOD.—The best of the Bloods. Medium size, nearly round. Follows the Navel.

THOMPSON'S IMPROVED NAVEL.—Closely allied to the Washington Navel, but a few days earlier.

VALENCIA LATE (Pickstone's).—Our special strain is almost seedless. Season latest. Flesh very rich colour. Skin light colour. A very valuable orange.

LIMES.

TAHITI.—Fruit nearly as large as a lemon. Very juicy and of the best quality.

CITRONS.

CITRON OF COMMERCE.—This is the true citron.

GRAPE FRUIT.

MARSH'S SEEDLESS.—Medium size. Almost totally seedless. A good keeper and what we consider the best of the Grape Fruits.

TRIUMPH.—Of extremely good flavour, but contains a number of seeds.

LEMONS.

EUREKA.—Tree nearly thornless. A prolific bearer. Fruit of the best quality. A general favourite.

GENOA.—Also known as Lisbon. Medium size, a long oval. Thin and smooth skin. A first class lemon in every respect and bears abundantly.

VILLA FRANCA.—A strong growing variety. Practically thornless. Fruit is oblong, juicy and nearly seedless. Sweet rind.

NARTJES.

CAPE NARTJE.—A selected sort, the best for export. Can be in every way recommended.

DANCY'S TANGERINE.—A similar variety to the Cape Nartje
OONSHU (SATSUMA).—A garden variety. Less susceptible to frost than any other variety of Citrus.

DISTANCE FOR PLANTING TREES.

For orchard planting all varieties in Catalogue 20 feet apart each way with the following exceptions:

Quinces ... 10 feet apart.

Vines ... 5 feet apart.

In gardens these distances can be varied to suit size and conditions.

TESTIMONIALS.

A few out of many hundreds of Testimonials received during 1932.

ODZI (S. Rhodesia)—“The 500 trees you sent up last year have done excellently up to the present and when Mr. ——— was up here in July he was very well satisfied.”

MOPEA (Zambesi River)—“The 100 Grape Fruit trees, despite frequent handling, all arrived safely and were immediately planted out. All except four took immediately, and these four have since taken, so that the whole consignment is now growing. We are very well pleased with the result which is a tribute to your selection and packing.”

KITALE (Kenya)—“You may be glad to hear that all the trees you supplied are looking very well and though planted under four weeks many have already formed leaves. Their healthy appearance and growth has caused much favourable surprise to those who have seen them.”

LIKASI (Congo Belge)—“I am pleased to inform you that I received the lemon and orange trees. They arrived to my entire satisfaction and I have no doubt that the next shipment will be in the same condition.”

TORO (Nigeria)—“I have to inform you that the trees supplied by you arrived here on the 23rd inst. Although they were two months in the post, all were alive on arrival and about half are already showing new growth—week after planting.

SOTIK (Kenya)—“I should like to take this opportunity of telling you how pleased I am with the fruit and citrus trees supplied to me last year. Out of the 100 I only lost one and the planting conditions were not good owing to the shortage of rain.”

HERTZOGVILLE (O.F.S.)—“I had 100% success with the trees received from you in 1928, and this year's trees arrived in splendid condition and have been planted very carefully.”

LONDON (England)—“The package of trees and vines came safely to hand and opened up in splendid condition; so fresh it seemed almost impossible they had been packed for three weeks to come 6,000 miles.”

MIKALONGWE (Nyasaland)—“I am glad to let you know that notwithstanding the fact that the trees were in packing for over four weeks, they are all growing.”

NANYUKI (Kenya)—“I have lots of your citrus and peach trees in full bearing and doing splendidly. The two bales of trees ordered arrived safely this morning and were in splendid condition and I feel satisfied that they will come on at once.”

ZEERUST (Tvl.)—“It gives me sincere pleasure to acknowledge receipt of the trees ordered recently. They are, as always, most satisfactory, both in size and quality, and opened up splendidly.”

EAST LONDON (Cape)—“In 1926 I got from you about 300 Keiffer Pear trees. They came into bearing this year and I am very well pleased with them.”

HOUT BAY (Cape)—“I must congratulate you for the splendid lot of trees you sent here. I must say that they are the finest lot of trees I have seen and I speak with some knowledge, as I have seen thousands of trees from California sent into British Columbia.”

Improved Quality and Earlier Ripening

FRUIT Trees and Vines demand a large amount of available plant food, to ensure regular and profitable yields. Good soil management is essential for maximum results.

Where the right fertiliser is used, trees and vines will give larger crops of better quality, that mature earlier and so pay better profits. We will gladly advise which of our fertilisers to use.
